Projects

HBTU Website | HTML, CSS, Bootstrap

1 week

- Designed and built a website for my college, HBTU, making it easy for users to find and explore different departments at their convenience.
- It mainly uses **Bootstrap** for styling. It is built using a collection of pre-designed **HTML, CSS**, and components.
- Live site here
- Github code

BookStore | Tailwind CSS, DaisyUI, MongoDB, React Js, Node JS, Express

1 weeks

- Developed a responsive bookstore website for seamless browsing across all devices. Integrated user-friendly functionalities such as signup, login, and access to a diverse range of free books.
- Enhanced user engagement by incorporating a contact feature, allowing users to send inquiries along with their email address.
- The project uses **ReactJS** to render all the data coming from the backend to the screen and make the website user-friendly.
- ExpressJS** provides authentication, and **Mongo DB** is used to store the data of the users and the books.
- It mainly uses **Tailwind CSS** and **Daisy UI** for styling.
